GigaView

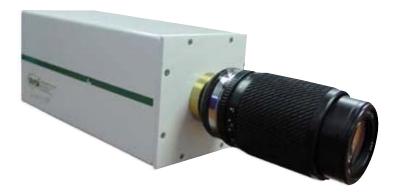

Are You Sure You're Seeing the Whole Picture?

Features

- 1280 x 720 HD resolution @ 750-fps to memory
- 640 x 480 VGA resolution @ 250-fps to hard disk
- 10 bit grayscale More information per image
- Gigabit Ethernet Interface (GigE) Robust TCP/IP connection for plant environment
- Up to 16 GB of memory Extends traditional record times
- Image-Cued Triggering Offers solution when an external trigger is unavailable
- Digital output for alarm or strobe

Process inspection, high-speed motion capture, and machine troubleshooting just got easier with SVSi's GigaView high-speed camera. Designed for true networked (TCP/IP) operation, GigaView can record an entire 8-hour shift of high-resolution high-speed video to diagnose equipment failures, power disruptions, or external interference. With the easiest-to-use software on the market (just turn it on and GigaView begins recording video), you can concentrate on maximizing efficiency.

GigaView reduces even the highest speed processes to slow-motion video that can be analyzed frame-by-frame. Through the combination of the highest resolution, longest record times, and fastest frame-rates, GigaView is the clear performance leader in high-speed video solutions for the production and packaging environments.

			Recording Time	
Mode	Resolution	Frame Rate (fps)	16-GB Memory	2.4-TB Hard Disk
Streaming	160 x 120 320 x 240 640 x 480 1280 x 1024	4,000 1,000 250 60	N/A N/A N/A	8-hours 8-hours 8-hours
Burst	320 x 240 640 x 480 1280 x 720 1280 x 1024	2,200 1,135 750 530	25-sec 25-sec 56-sec 112-sec	N/A N/A N/A N/A

GigaView

Specifications

Continuous Streaming

Resolution: 640 x 480 @ 250-fps Record Time: Up to 8-hours

High Definition to Camera Memory

Resolution: 1280 x 720 @ 750-fps Record Time: Up to 30-seconds

Camera

Shutter: 1/50 - 1/100,000

Sensor: 10-bit mono or 24-bit color Trigger Source: Standard TTL or

Image-Cued

Multiple-event recording capability

Lens Mount: C-mount*

Interface: TCP/IP 100/1000-BaseT

Size: 4.25"x4.25"x11"

Weight: 3.4 lbs

Software: Video Record/Playback

Image-Cued Trigger

A troubleshooting aid unique to GigaView is the ability to trigger the recording process from an event in the camera's field-of-view. If you know what happens but not when, GigaView can look for the event itself and record digital video before and after the fact with a minimum of excess frames so that you can go straight to the cause of the problem.
